Attorney Docket No. 08295.0004-00000

claims that the Examiner may suggest for placing the claims in better condition for allowance.

PROPOSED AMENDMENTS TO CLAIMS 15 and 18

15. (Proposed Amendment) A test method for testing a vehicle collision prediction apparatus or a component thereof by using a testing apparatus for a vehicle collision prediction apparatus, comprising:

a radar mounted on a vehicle;

a dummy object spaced away from the radar; and

a reflection plate attached to the dummy object,

wherein the reflection plate has a first amount of reflection, and the dummy object has a second amount of reflection, wherein the second amount of reflection is less than the first amount of reflection, wherein the reflection plate is deformable configured to deform into a plurality of concave/convex portions; and

a driving portion configured to move part of the reflection plate such that shapes of the concave/convex portions and a reflection state of the reflection plate are changed.

18. (Proposed Amendment) A testing apparatus for a vehicle collision prediction apparatus, comprising:

a radar mounted on a vehicle;

a dummy object spaced away from the radar; and

a reflection plate attached to the dummy object,

wherein the reflection plate has a first amount of reflection, and the dummy object has a second amount of reflection, wherein the second amount of reflection is less than the first amount of reflection, wherein the reflection plate is deformable configured to deform into a plurality of concave/convex portions; and

a driving portion configured to move part of the reflection plate such that shapes of the concave/convex portions and a reflection state of the reflection plate are changed.
